

New SeaStar Power Assist (-3 Series)

Figure 1. Updated SeaStar Power Assist (-3 series).

Dometic Marine is pleased to announce that we have updated our very popular SeaStar Power Assist product and have eliminated redundant models. The new -3 series of SeaStar Power Assist pumps have undergone a performance improvement with new electronics and the addition of ORB fittings similar to steering helms and cylinders.

The new (-3 series) pumps will be a direct replacement for the existing (-2 series) pumps. The new steering pumps will begin shipping in January 2025 for any new orders leaving our Dometic Vancouver manufacturing location. At this time the previous design will no longer be available. Orders will be automatically changed to reflect the new part number.

If you require any assistance with these changes please contact your Dometic regional manager or our technical services department at: (604) 248-3858. You can also email us at: seastar@dometic.com

Current Part #	Description	New Part #
PA1200-2	SeaStar Power Assist, 15'	PA1200-3
PA1200-2HP	SeaStar Power Assist, 15'	PA1200-3HP
PA1206-2	SeaStar Power Assist, 6'	PA1206-3
PA1225-2	SeaStar Power Assist, 25'	PA1225-3

NOTICE!

Fitting kit HF6004 can be used to convert the output fittings to 90° for space-constrained applications.

90° fittings can only be installed at the output side of the SPA.

CAUTION!

Do not use NPT fittings. Using NPT fittings will damage the SPA.

Discontinued models
